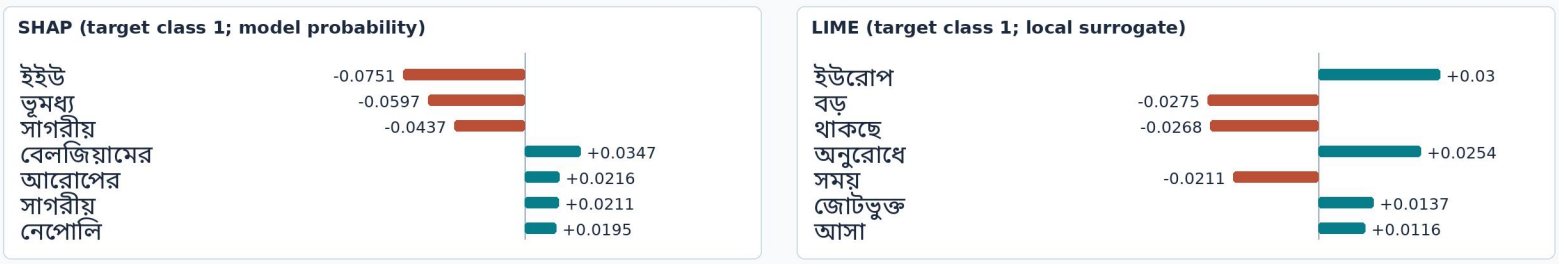

FIGURE 5 FAKE NEWS | FOUR-WAY SHAP–LIME AUDIT

Signed contribution toward the predicted class: teal supports, red opposes.
One deterministic case per source-label/prediction outcome; illustrative cases, not performance estimates.

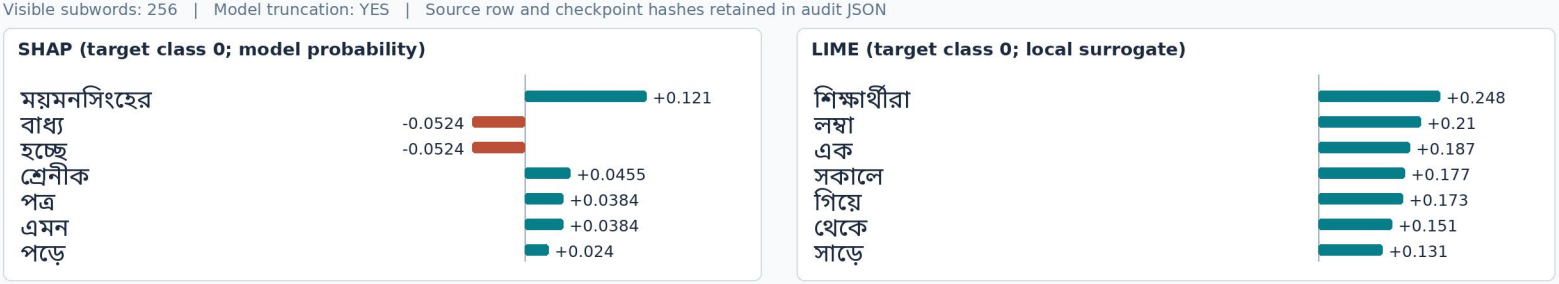

TP row 6448 SOURCE FAKE (1) -> PRED FAKE (1) p=0.9536

Visible subwords: 256 | Model truncation: YES | Source row and checkpoint hashes retained in audit JSON

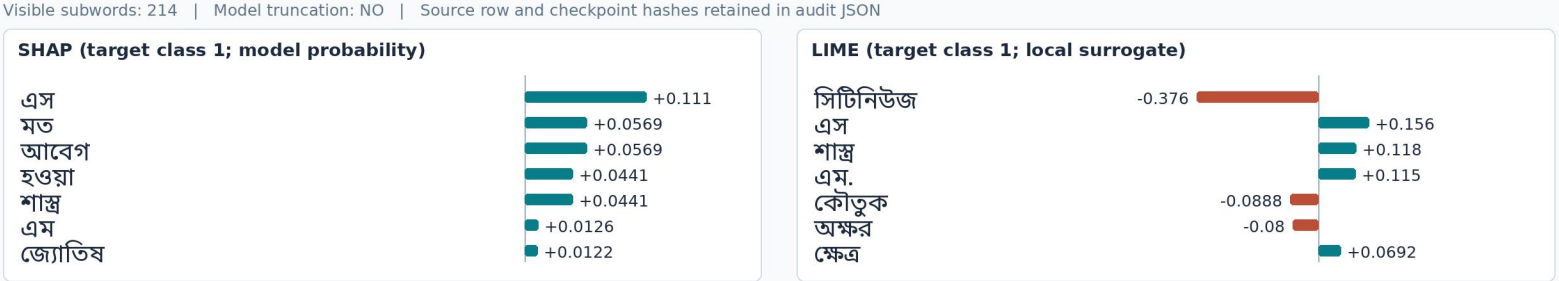

TN row 8585 SOURCE REAL (0) -> PRED REAL (0) p=0.9989

Visible subwords: 256 | Model truncation: YES | Source row and checkpoint hashes retained in audit JSON

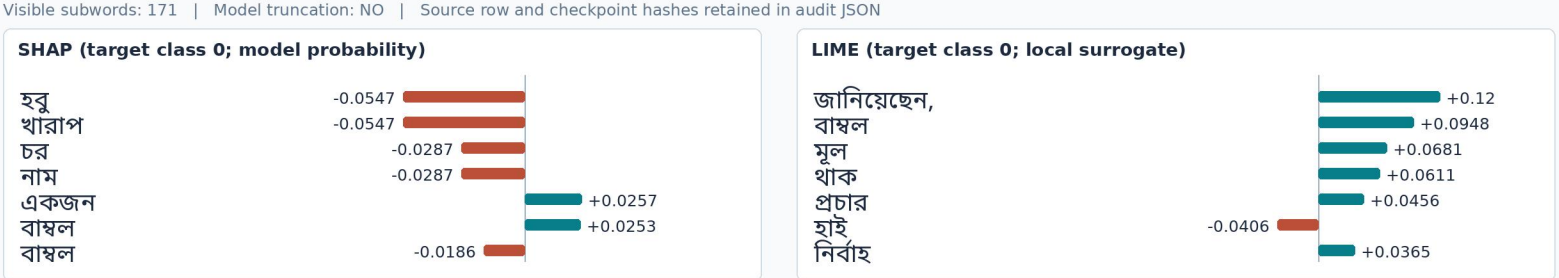

FP row 1102 SOURCE REAL (0) -> PRED FAKE (1) p=0.7708

Visible subwords: 214 | Model truncation: NO | Source row and checkpoint hashes retained in audit JSON

FN row 9377 SOURCE FAKE (1) -> PRED REAL (0) p=0.9791

Visible subwords: 171 | Model truncation: NO | Source row and checkpoint hashes retained in audit JSON

Up to seven lexical/numeric features per panel; punctuation-only tokens hidden from display. Original numerical evidence and hashes are unchanged in the audit JSON.
