SUPPLEMENT S12 FAKE NEWS | 2 LONG-ARTICLE, 256-TOKEN-WINDOW XAI

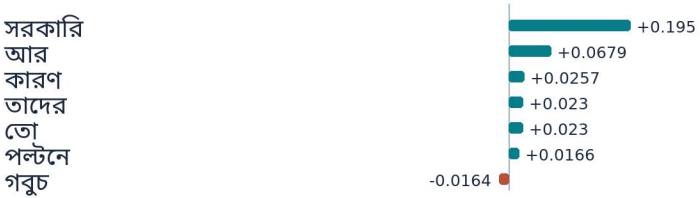

Signed contribution toward the predicted class: teal supports, red opposes.

Two deterministic, source-long articles (one per source label), each truncated at 256 model tokens.

LONG SOURCE 0 row 4731 SOURCE REAL (0) -> PRED REAL (0) p=0.9993

Visible subwords: 256 | Model truncation: YES | Source row and checkpoint hashes retained in audit JSON

SHAP (target class 0; model probability)

LIME (target class 0; local surrogate)

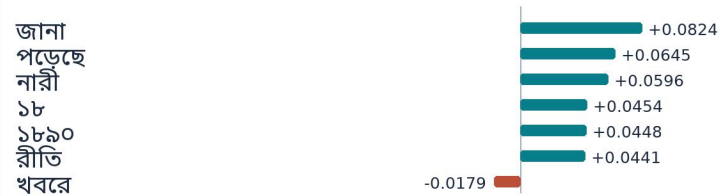

LONG SOURCE 1 row 5227 SOURCE FAKE (1) -> PRED REAL (0) p=0.9442

Visible subwords: 256 | Model truncation: YES | Source row and checkpoint hashes retained in audit JSON

SHAP (target class 0; model probability)

LIME (target class 0; local surrogate)

Up to seven lexical/numeric features per panel; punctuation-only tokens hidden from display. Original numerical evidence and hashes are unchanged in the audit JSON.
