SUPPLEMENTARY FIGURE S8

Fake news | Seed-42 BanglaBERT | IG vs SHAP

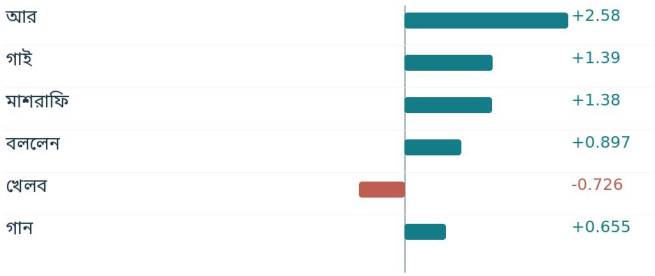

Selected actual TP/TN/FP outcomes; target = predicted class (not corrected gold).

TP | test row 914 | source=1, predicted=1 | p=0.9998

IG 256 integration steps; absolute completeness residual = 0.00181; no truncation

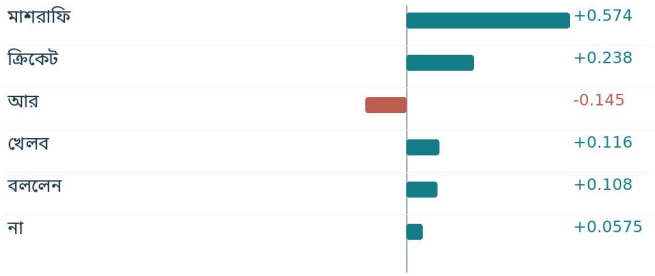

Layer Integrated Gradients

Signed logit attribution

SHAP

Signed probability attribution

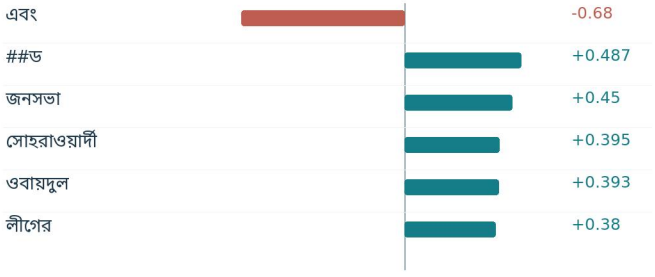

TN | test row 4034 | source=0, predicted=0 | p=0.9995

IG 256 integration steps; absolute completeness residual = 0.02401; no truncation

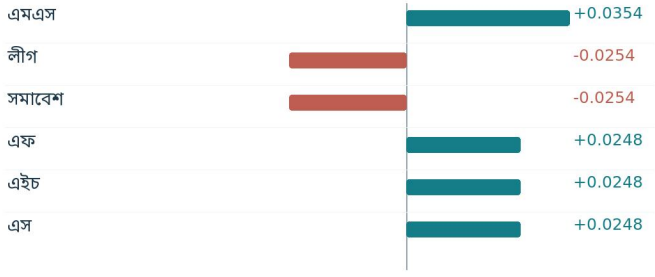

Layer Integrated Gradients

Signed logit attribution

SHAP

Signed probability attribution

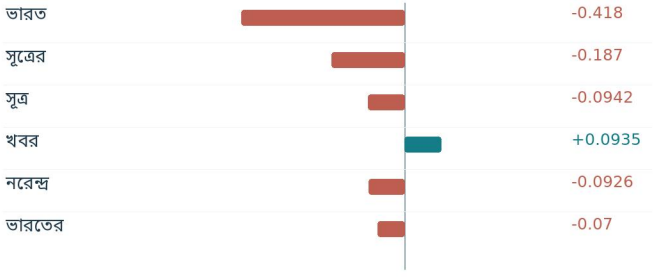

FP | test row 3845 | source=0, predicted=1 | p=0.9641

IG 256 integration steps; absolute completeness residual = 0.00000; no truncation

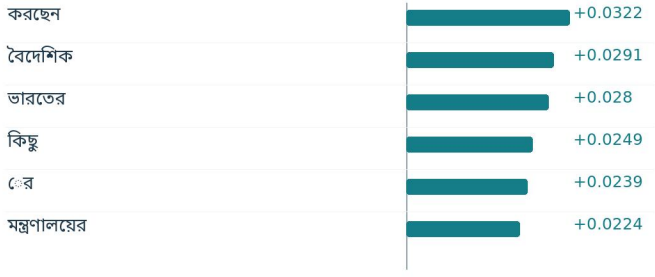

Layer Integrated Gradients

Signed logit attribution

SHAP

Signed probability attribution

Teal supports the predicted class; rust opposes it. Panels are independently scaled.

Illustrative examples only; no FN in this saved 20-case cohort. IG/SHAP units differ.
